#### **DETAILED ACTION**

### Claim Objections

1. Claims 10-17 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claims 4 and 11. See MPEP § 608.01(n).

#### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1,2,4, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishii et al (US 4,875,519).

As to claims 1 and 2, Ishii et al disclose a method of manufacturing aluminum pipe with solidified shell less than 13mm (figure 1).

As to claims 4 and 5, the casting rate is 70 mm/min (col. 6, line 29).

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Application/Control Number: 10/556,727 Page 3

Art Unit: 1725

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

- 5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 6. Claims 3 and 6-17rejected under 35 U.S.C. 103(a) as being unpatentable over Ishii et al (US 4,875,519).

Ishii et al disclose the claimed invention above, but lacks the mentioning of casting the aluminum billet while keeping a distance from a lowermost portion of a mold to an upper surface portion of a molten aluminum to be 40 mm or less.

However, it would have been obvious to have a mold of 40mm or less, since in continuous casting, the mold need not be to long as molten metal solidifies and carry downward to another treatment chamber. The mold is only used for cooling and solidification purposes.

Therefore, it would have been obvious to have a short mold, in order to reduce friction between a solidified billet and the mold as the billet is being drawn downward.

Art Unit: 1725

### Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Len Tran whose telephone number is (571) 272-1184. The examiner can normally be reached on M-F, 8:30 - 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
